

# THE GLEICHEN CALL

VOLUME 47 NO. 33

Authorized as second class mail, GLEICHEN, ALBERTA, WEDNESDAY  
Post Office Department, Ottawa.

NOVEMBER 3, 1954

SUBSCRIPTION \$2.00

## HERE AND THERE

Wm. Cook has purchased the residence of Gordon Larson located on Broadview Avenue.

The bazaar and afternoon tea held by the Catholic Women's League of St. Victor's Church proved to be a very successful affair. It was held in the Parish Hall.

Major A. F. Parkinson who for many years was in charge of Eventide Home until he was moved to Galt, Ont. to take charge of a Salvation Army Home there has been promoted to the rank of a Brigadier. Major E. Broom received this information last week.

Thomas Wilson a guest at Eventide Home died at the age of 81 years. He was born in North Carolina and had lived in Alberta for the past 42 years. He came to Gleichen from Calgary a little over two years ago. The funeral took place Monday afternoon at 2 o'clock with Major E. Broom of the Salvation Army officiating. Interment was made in Eventide cemetery.

Hallowe'en passed off rather quietly in town. Little if any damage was done. An odd out house was turned over and very little rubbish was thrown on the streets. The little folks had lots of fun going from house to house with their bags looking for hand-outs. Some Indian boys decided to have some fun with the town fire fighting equipment and had some of it on the street when they were ordered to put it back in the fire hall which they did and went happily on their way. Some of the adults in town decided it was a good night to dress up and demonstrate their acting abilities. They had plenty of fun with their friends.

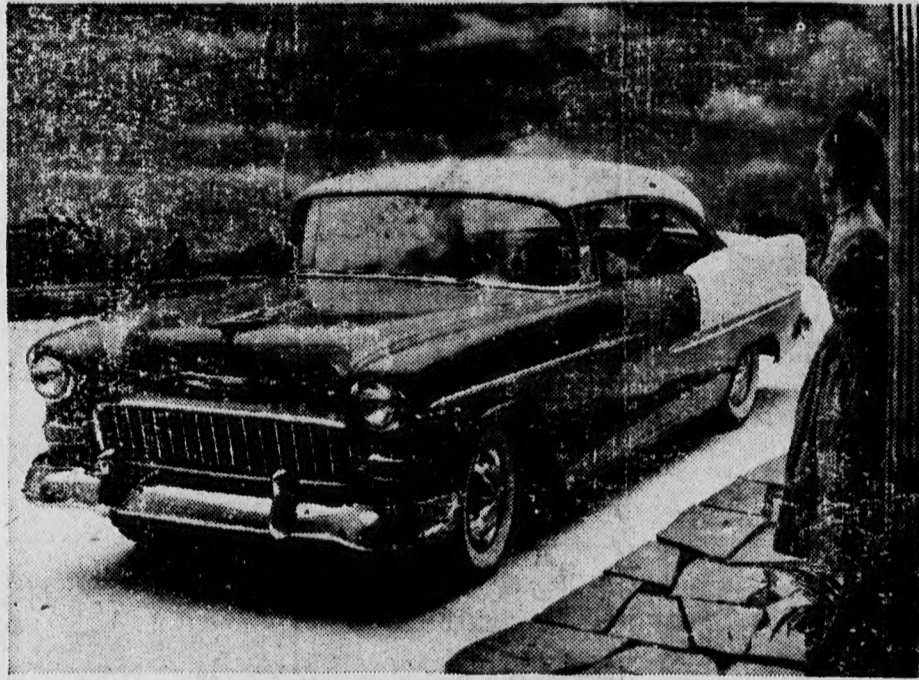

**SEEDTIME and HARVEST**  
By DR. F. J. GREANEY, Director,  
Line Elevators Farm Service,  
Winnipeg, Manitoba.  
Sponsored by the following companies:  
Federal, Alberta Pacific, Pioneer, Canadian Consolidated, Peterson, McCube, Parrish & Heimbecker, Inter-Ocean, Independent Milling and Quaker Oats.

**ON STORING DAMP GRAIN**  
Owing to the late, wet harvesting season, the problem of storing "tough" and "damp" grain will be the cause of much concern to many farmers this winter. As announced earlier by the Board of Grain Commissioners, farmers who thresh "tough" and "damp" grain will have to store it themselves as space is not available in country and terminal elevators.

"Tough" Grain. With proper precautions it should not be too difficult to store "tough" grain safely on the farm, especially if the moisture content is under 16%. Here are a few important points: (1) As low moisture content is the key factor in safe grain storage, aim to store your grain as dry as possible. (2) Store "tough" grain in your smallest granary, where you can get at it for frequent examination, and for turning, if necessary. (3) Cool and clean your "tough" grain during cold weather. Remember, the drier, the cleaner, and the cooler you can get your "tough" grain the longer it will store safely.

"Damp" Grain. The safe storage of "damp" grain presents a more serious problem, especially if the moisture content is over 18%. If your grain is "damp", you will have to dry it on the farm before Spring. In the meantime, get the moisture content down as low as possible, keep the temperature down, and clean the grain. Cleaning is a "must" for "damp" grain. The simplest method of drying grain is to mix "damp" grain with dry grain of the same grade, of course, if this is available. If you need a drier, however, use a recommended "batch" drier, but be sure and keep the temperature of the hot air down to 135°F. to avoid grain damage. Furthermore, don't attempt to dry seed-grain, or barley for malting. Seek advice on the best grain-drying methods from your Agricultural Representative, and contact your elevator Agent for help in having samples of dried grain tested at the laboratory of the Board of Grain Commissioners.

## COMPLETELY RE-STYLED CHEVROLET FEATURES V8 ENGINE

The futuristically designed 1955 Chevrolet, offering for the first time, a high-output 182 horsepower V8 engine as well as a more powerful six cylinder "Blue Flame" economy-leader, was announced across Canada today. Greatly increased comfort and driving qualities stemming from re-engineered frame and suspension

are enhanced by the first "dream car" styling in the low price field. The Bel Air Sports Coupe (above) illustrates the broad, low grille and hood treatment, greatly increased vision through the new sweep-sight windshield, and the "fleet" look imparted to all 14 body styles by the longer, lower lines of the new models

## "Cal" Driver Killed Near Queensdown

B. Crow, a caterpillar tractor driver, employed by Cam Evans, was killed in the early hours of Tuesday morning when the machine turned over while working along the banks of the irrigation canal near Queensdown. There were several other machines working in the same area and it was one of the drivers of these that discovered the turned over machine with the driver pinned underneath. Deceased is survived by his wife and family and parents all living in Calgary.

## RAT POLICY

The Alberta Department of Agriculture has announced the commencement of a new rat control policy for Alberta. As most of us are aware, the rat poses a real problem in this province. There is a movement of rats generally westward direction due to overpopulation in areas where control measures are not practiced. Alberta is the last frontier for the rat, an area this pest has never been able to conquer. Under the new policy several municipalities and improvement districts are appointing full time pest officers to assist and direct farmers in rat prevention and control.

The whole program is designed to prevent the westward movement of rats by a thorough clean-up program and by the use of poisons, mainly warfarin. The areas which are involved include the municipal districts of Vermilion River, Wainwright, Provost and Acadia Valley, the area designated as the Special areas and Improvement Districts 1, 11 and 21. This takes in an area along our eastern border from the United States boundary to the North Saskatchewan River north of Lloydminster.

According to Arthur M. Wilson, Field Crops Commissioner, the Department of Agriculture will co-operate with municipalities by providing all poison materials, provide field men to assist the pest officers and pay part of the cost of employing the pest officers who have the responsibility of carrying the campaign to the individual farms. Farmers will be urged to rat proof buildings by proper construction and maintenance, thereby protecting feed supplies and destroying rat harborage. About 6,000 farms are included in the areas involved. Farmers and all residents in the border area are asked to co-operate in this program. If the people fail to play in keeping rat populations from becoming a serious menace in all parts of Alberta.

## TWO MEANINGS OF LATE

How terrible it is, on losing someone dear to us, to be compelled to say, "If we could only have got him to a doctor, his life could have been saved." How much worse if a doctor, being told of this, makes the response, "True but if you had only taken a six-week course in first aid, you could have saved him anyway."

There is something of the same situation when lives are lost through highway accidents. Every day, people die who could have been saved if only knowledge had been present instead of ignorance. Statistics have shown repeatedly that the great majority of road accidents are caused by personal failings. Mechanical defects, road conditions, weather and the physical health of drivers are negligible.

In the private opinion of a man closely concerned with highway safety, statistics tell only half the story. As he says, "Suppose I start out on a long journey and, on getting the car from the garage, notice the brakes are not too good but decide to take a chance. If, then, I have an accident, it will be listed as due to a mechanical defect whereas obviously, it is really a personal fault."

His estimate is that, if the true causes of all road accidents could be discovered, well over 99 per cent of them would lead directly to personal default or negligence.

Highway safety depends on the attitude of drivers from education, training and enforcement. Of these three, a great deal of thought is given to the traffic laws and the best methods of enforcing them. They are being constantly revised and improved. So much for enforcement.

Education and training are two branches of the same thing. Education instructs on what to do and training gives practice in doing it. But, because most of the elements of safety education and training are matters of common sense, it must not be assumed that they need not be studied.

What man thinks he is not the possessor of common sense? The fact remain that the truck driver who is trained in highway safety—and the majority of firms these days train their drivers, has a better accident record than the salesman who uses an automobile and generally is not trained.

One important suggestion which has been made is that, when applicants for licenses are taking their tests and when others are being re-checked, training in safety should be given by a qualified instructor. The instruction should be uniform and the safety tests highly exacting.

What about speed? Surely something might be done to reduce this greatest of all highway hazards. Admittedly, the slow poke may be a nuisance and

traffic hold-ups are tiresome. But you rarely hear of people being killed in a hold-up.

A pointed comment came from a passenger on an airliner from Montreal to Britain when, unable to put down at Goose Bay through fog, the pilot turned back all the way to Montreal. "Well," he said, "I'd rather be alive in Montreal than dead in Goose Bay." It is not a very good idea to take such pains to avoid being "late" in the sense of behind time that we achieve its other meaning of deceased.

All of the Gleichen school teachers attended the convention in Calgary last week. They were: Mr. and Mrs. Smith, Mrs. Sherback, Mrs. Bain, Mrs. Lloyd and Mrs. Turnbull.

## IMPORTANT PUBLIC MEETING

Will be held in the Meadowbrook Hall, three miles north of Gleichen on November 8th, 8 p.m.

**PURPOSE**—To discuss Producer Marketing Boards and related Legislation.

**SPEAKERS**—Mr. Roy C. Marler, President of the Alberta Federation of Agriculture; K. V. Kapler, Vice-President, and Mr. G. E. Bell, local M.L.A.

This is an important issue and all interested are urged to attend.

ALBERTA FEDERATION OF AGRICULTURE

**EATON'S Christmas Book**

Over two hundred pages of Christmas-shopping values—eighty pages in full colour—here's a Christmas Book that brings great news, of great choice in leading values. Now going out to EATON customers—and sent on request while the issue lasts.

Buy from this and our big Fall and Winter Catalogue. You'll find it Pays to Shop at EATON'S—for widest selection, leading values, satisfying service!

T. EATON CO. LIMITED

**Safety Sam Says...**

**Baiting Bulls is safe and sane.. compared to speeding in the rain!**

The trouble with rain is it gets on your windshield, so you can't see out, and also it makes the road slippery. Particularly in the wintertime, when it's apt to freeze. It's easy to go slow when it rains. All you do is lift up a little on the accelerator. You're likely to live longer that way.

## Swift Current Agro expert describes life in Iceland

SWIFT CURRENT.—J. B. Campbell, forage crop expert at the Dominion experimental station has just returned to Swift Current from a trip to Iceland, where he has been giving technical advice to the Icelandic government in utilizing grazing land in the country.

Mr. Campbell described much of Iceland as a large desert, with blowing sand, high mountains and glaciers.

Occupations of the country vary from fishing to big industry, he said. Mr. Campbell said that the sea was very bountiful with cod, which was one of the main fish products, Herring and haddock are also plentiful.

The pasture land is being reduced by land erosion, caused by blowing sand, Mr. Campbell said and the bad areas are being taken from production and sown to grass.

### Big problem

Right now the big problem is to get enough grass. Eventually the desert land of Iceland will be transformed into areas very similar to Saskatchewan's community pastures, Mr. Campbell said.

The climate for horses, cattle and sheep is harder than that in Saskatchewan, the forage specialist pointed out. The animals are much alike in appearance to those seen in parts of Europe 1,000 years ago. The stock in most cases appeared to be a "small edition" of Canadian stock, Mr. Campbell said. In many cases weight of cattle does not exceed 750 pounds.

The people of the country are very practical, and most everyone works. In the cities girls 12 to 16 years of age do the gardening in the parks, children from 10 to 12 years of age work in the hay fields, and operate tractors and other haying equipment with great skill.

Mr. Campbell said he was impressed with the smallness of the jails in the country, and upon delving into the matter he found that the policy was not to confine people to prison for long periods, but instead, to put into practice a program of rehabilitation.

### Oldest country

Iceland is the oldest country in the western world with a representative government.

Heads of families set a tradition.

## ARTHRITIS

Try Edoen, guaranteed herbal treatment for arthritis, rheumatism, pleurisy, safe, effective. Month's supply \$5. Money back guarantee. Write for particulars. PICKWOOD PHARMACAL CO., LTD., Milton, Ontario.

## More Comfort Wearing FALSE TEETH

Here is a pleasant way to overcome loose plate discomfort. FASTENERS, an improved powder, sprinkled on upper and lower plates holds them firmly so that they feel more comfortable. No gummy, sticky, pasty taste or feeling. It's alkaline (non-acid). Does not sour. Checks "plate odor" (denture breath). Get FASTENERS today at any drug counter.

## PINEX cough syrup

## Concentrate

### INSTANT RELIEF FROM COUGHS

due to colds

The active ingredients of time-tested Pinex cough syrup bring fast, welcome relief from distressing coughs. You save money too when you buy Pinex Concentrate. A bottle mixes with honey or syrup to make 16 ounces of pleasant-tasting cough medicine that's good for the whole family. Keep it ready for the very first sign of a cough.

At all druggists

which their successors follow. From these traditions have come a code that has guided the country to a free and independent state.

Mr. Campbell said that Iceland was known to Grecian explorers before the birth of Christ. Irish monks inhabited it about 700 A.D. and stayed for a hundred years. The first parliament met in 930 A.D.

Iceland is settled largely by Norwegians, because of its location, although there are plenty of people of Irish and Scotch origin too.

According to Mr. Campbell the cities of Iceland are very beautiful, and modern, and many of them are being rebuilt at the present time.

The public school course is of six years duration. Good trade schools, and places to serve apprenticeships are available and English is one of the regular subjects in the grade school.

## Home Workshop

These so-called Dutch designs were selected as typical of the wide variety of hearts, flowers, fruits, and leaf symbols used by the early Dutch settlers in Pennsylvania. The twelve designs on the pattern are correct size for use in tracing onto cupboard doors, wall panels and other large spaces. There are also designs for small spaces such as chair backs, drawer fronts and box tops. These are all authentic and the patterns are step by step details for the selection and use of paints. No special skill is needed as all outlines are traced directly to the surface to be decorated. This pattern may be ordered separately at 35c. The number is 262. It is included in the packet of Painting Patterns for Leisure-Time Artists at \$1.50 postpaid.

This crib is easy to make with ordinary household tools and all metal fittings will be found at any hardware store. The pattern gives a list of materials and dimensions for the different parts and a large perspective sketch showing just how the pieces go together. The lamb pattern is taped to thin plywood so that the saw and painting outlines may be traced. Areas of flat color are shown on the pattern in natural gradation of tone to give the lambs a realistic effect when glued to the ends of crib and the nursery walls. Pattern 357 may be ordered for 35c or it will be included in the Small Household Packet of five standard size patterns for \$1.50 postpaid.

Address order to—  
Department P.P.L.,  
Home Workshop Pattern Service,  
4435 West Fifth Avenue,  
Vancouver, B.C.

## Retirement at 65 scored by doctor

VANCOUVER.—A top medical expert on old age said too many Canadian workers are being forced to retire at 65, regardless of their mental and physical abilities.

Dr. Ian Macdonald, chief of medical services at Toronto's Sunnybrook Veterans' hospital and a member of the medical faculty at the University of Toronto, said:

"It's bad for the individual and bad for the community if an able-bodied man is forced to retire simply because he has reached the chronological age of 65."

"It has been proved over and over again that no people age at the same rate and there is no good reason why a compulsory retirement age of 65 should be arbitrarily laid down."

### MOTEL BOOM

Canada has more than 3,500 motels, with an average size of 15 to 20 rooms. 3114

FOUR-MONTHS-OLD NANCY THORPE, who is the youngest child to be orphaned by hurricane Hazel's path of destruction through the Toronto area. Mrs. Clifford Thorpe, Nancy's mother, handed the child to fire chief Albert Houston as the waters rose. Before the chief could return to aid the family the house was swept away. Mr. and Mrs. Thorpe, their four-year-old son Bobby, and Nancy's grandmother, were drowned.

## Three important factors govern keeping quality of vegetables

Three highly important factors govern the keeping quality of vegetables when these are stored in the home basement or root cellar, states Chas. Walkor, Senior Horticulturist, Experimental Station, Morden, Man. These factors are: 1. Desirable maturity or degree of ripening of the vegetables to be stored. 2. Freedom of surface moisture on the vegetables and, 3. A steady and cool storage temperature.

It is not difficult to tell when vegetables are fit for storage. Onion bulbs will have dry, golden scales and the foliage will be yellow and dry right to the top of the bulb. Pumpkins and squash when ripe are well colored and have a hard rind that is difficult to puncture with the thumb nail. Cabbage that is ready for storage has firm, solid heads and foliage which is a strong blue color.

### Dry storage

As a rule it is desirable to place the vegetables in a dry place for approximately a week after harvesting. This helps to rid the produce of excess moisture which is often the cause of spoilage in storage. It has been found, also, that if pumpkins and squash are first kept at a temperature of 60 degrees F. for two weeks and then transferred to dry storage at 40 degrees F. they will keep until well after Christmas.

At the Morden Station, hot air at a temperature of 90 degrees F. is blown through crates or sacks of newly harvested onions for 10 days to improve their keeping quality.

The home gardener is advised to remember the importance of storage type vegetable varieties when

purchasing seed for spring sowing. A good plan is to contact the nearest experimental station for a list of recommended vegetable varieties.

## Funny and Otherwise

On her way to bed, the maid looked into her mistress's room. "The master's locked up for the night, ma'am," she said.

Her mistress looked puzzled. "Really, Jane," she said, "he must have been very quiet. I didn't hear him come in."

"He hasn't, ma'am," exclaimed Jane. "The police have just phoned."

"I can't bear that man. He always smiles to himself whenever I say anything silly."

"I know, dear. A sort of perpetual grin."

"Getting married, I hear?"

"Yes, old chap. To the very first girl I fell in love with."

"Well, I congratulate you on your memory."

A fellow had just got back from Hollywood. He had been dazzled by the display of glamour and bigness in the movie colony.

"Everything is done on a tremendous scale," he told friends. "I attended dinner at a producer's home one evening and instead of using finger bowls at the end of the meal all the guests took showers!"

Medic: "Is there any insanity in your family?"

Bill: "Yes, I'm afraid there is. They keep writing me for money."

An actress made a practice of trying to do away with herself because of her complicated affairs of the heart. The fifth time this romantic lady had been rushed to hospital, a well-known columnist offered a word of advice.

"You want to go easy on this suicide stuff," he said kindly. "The first thing you know you'll ruin your health."

Latest in shaggy dog yarns... At a local dog track a greyhound, settling on its haunches, took out a powder puff and started powdering its nose.

"What's the idea?" asked a rival.

"Well, you can never tell," came the reply, "there might be a photo finish."

Today Is Yesterday's Pupil

## Canada spending 210 million to build 14 new sub chasers

OTTAWA.—Canada is spending \$210,000,000 to construct 14 new sub chasers. Although there have been snags, the first vessel will be completed late in 1955.

Shipbuilding officials in the defence production department admit progress has been "very slow" but add that snags are being overcome. They estimate all of the so-called St. Laurent class of destroyer escort vessels should be delivered to the navy by late 1957.

"We did not encounter any single major problem, but a lot of little problems," one authority said. "We had problems in getting priorities in materials constant changes of design by the navy and all other headaches encountered in designing an entirely new type of vessel."

"Now every one is working desperately to get the lead vessel completed as soon as possible."

### Construction started

The lead vessel, named the St. Laurent, is under construction by the Canadian Vickers shipyards at Montreal. Few details of the sub chasers have been made public.

Total cost of the vessels, on which design work started in 1949, now is estimated at \$210,000,000 or \$15,000,000 each. The ships will be 366 feet long with a displacement of 2,000 tons and each will have a crew of 270 officers and men.

The ships will have longer-range asdic to probe for sub-marines and will have improved armament. Each ship will be equipped with two squids or mortar-type of shell launcher, firing explosion-timed shells over the ship's bow.

Six sub chasers now have been launched, but there still is a lot of work to be done on each before it is completed, including installation of electronic equipment and the superstructure.

### Six launched

The six chasers launched and the place of construction:

St. Laurent, Vickers; Saguenay, Halifax shipyards; Skeena, Burrard Drydocks, Vancouver; Ottawa, Vickers; Fraser, Arrow's

## When Skin Itch Drives You MAD

Here is a clean stainless penetrating antiseptic—known all over Canada as MOONE'S EMERALD OIL. It dries right in and brings swift sure relief from the almost unbearable itching and distress.

Its action is so powerfully penetrating that the itching is promptly eased, and with continued use your troubles may soon be over.

Use Emerald Oil night and morning as directions advise for one full week. It is safe to use and failure is rare indeed.

MOONE'S EMERALD OIL can be obtained in the original bottle at any modern drug store—sold satisfaction assured or money back.

## Kitchen Meditations By JANE DALE

### MY MINUTES AND HOURS

I would that all the minutes which go to make up my day be good ones. So many are spent by my blundering, my thoughtlessness, or by my utter blindness. Another day will come and with it another quota of minutes and hours. May I, some day, keep each one shining brightly so that darkness comes they will be like as many stars in a lonely night.

## Self-Iced SPICE CAKE

Sift 3 times, 2 1/4 c. once-sifted pastry flour (or 2 c. once-sifted all-purpose flour), 2 1/2 tsp. Magic Baking Powder, 1/2 tsp. salt, 1 1/2 tsp. cinnamon, 1/4 tsp. each of ground cloves, ginger, allspice, nutmeg and mace; mix in 1/2 c. seedless raisins and 1/4 c. chopped walnuts. Cream 1/2 c. butter or margarine and blend in 1 1/4 c. lightly-packed brown sugar; beat in 3 well-beaten egg yolks and 1/2 tsp. vanilla. Add dry ingredients to creamed mixture alternately with 3/4 c. milk; spread batter in greased 9" square pan lined in the bottom with greased paper. Beat stiff, not dry, 3 egg whites and a few grains salt; gradually beat in 1 c. lightly-packed brown sugar and spread over cake; sprinkle with 1/2 c. chopped walnuts. Bake in rather slow oven, 325°, 1 1/4 to 1 1/2 hours; cover lightly with brown paper for last half hour.

Always Dependable

### THE TILLERS

—By Les Carroll

## OUR COMPLETE SHORT STORY —

## Goodnight, Sweetheart

By JOHNNY ROWLEY

CHARLEY FERRIS had always said "Goodnight sweetheart" to his wife the last thing before going to bed when they were first married. He had continued the practice when he was thirty . . . and when he was forty, and now that he was seventy-three he saw no reason for giving it up.

"Goodnight sweetheart," he murmured, standing in the dusk of the upstairs room in his daughter's home.

He didn't get into bed immediately but went and stood by the window overlooking the garden. It was hot with the heat of late summer after a scorching day and was only now, at ten o'clock, beginning to cool off. He stood there, absently, drinking in the warm glow of the moon, scarcely thinking, when he caught the murmur of voices from the clump of ever-

greens around the small summer house.

He didn't mean to eavesdrop but the voices wafted up to him on the cool evening breeze were clear and distinct. He knew at once who was there and frowned.

His granddaughter Dorothy . . . Dot, as she was to the family . . . was almost the image of his wife when they were first married. For that reason he had always thought more of her than his other grandchildren. Only today he had heard that she and Dick Albright were on the verge of breaking up. The news had bothered him for he thought a lot of them both and had been looking forward to the day when they would be married. He had continued to worry about it all day.

His hesitant offer of help had been met with refusal. "It's nothing you can do anything about, Gramps," Dot had told him. "It'll just have to work out of its own accord."

He had had to be content with that but it had continued to worry him. The voices were lower now and he could only catch a word now and then.

He heard Dick say earnestly: "But Dot, if we're to make this thing work out we've got to trust each other." Dot's reply was lost in the night air but the old man had scarcely listened for it.

His mind had gone back almost fifty years. "Did you hear that, Nancy?" he asked. "He says they've got to trust each other." He chuckled. "Remember that time I had to go to Chicago and was a day late in getting back? That was bad enough . . . but when you found the gloves in my valise, the ones I'd forgotten to give you, you thought I was lost for sure. It was a long time before you would trust me completely." He sobered suddenly, coming back to the present. "They're going through the same thing, Nancy," he said.

They were talking again, earnestly, and had got up and stood now just in front of the summer house where the warm glow of the moon glinted softly on the girl's hair.

She was slim and tall and her hair, tumbling in soft curls was a raven black. "You know I love you," he heard her say. "I guess I always will . . ."

He didn't hear any more for his eyes had filled and he was thinking of another garden in the moonlight and of another girl. "She's the spitten image of you when you were twenty, Nancy," he said.

**ABANDONED CHILD**—Darlene Johnson, about three, who was abandoned by her mother some time ago, makes her daily telephone call to her foster father. The youngster was left to board at a neighbor's home in Winnipeg for a few days and was never picked up. The Children's Aid Society, seeking information as to her mother's whereabouts, has placed the child in a temporary foster home.

"Do you remember the night I asked you to marry me . . .?" He was lost for a few moments in contemplation. "It was a night like this," he continued finally. He meditated on the scene, his eyes half closed. "It's almost as though it were yesterday," he murmured.

As he watched the boy stepped forward and attempted to take her in his arms. For a moment she protested, but only for a moment, and with a muttered exclamation pressed her face to his.

Again the scene faded for the old man and he was seeing another scene, a scene out of his own past. "Remember that night at Haloran's beach, Nancy?" he whispered. "The night was as cool as this one . . . and the moon shining on the waves made them look all silvery. I took you in my arms . . ." He stared out of the window, his eyes unseeing, looking back into an almost forgotten past.

He shook his head to get rid of the image and looked again into the garden. Dick had hold of both her hands and was talking earnestly. She was looking up into his eyes and in the dim light of the moon he thought he could see a smile on her face.

They stood like that talking for several minutes and then he could see that Dick was about to leave. The fear he had forgotten in his own reminiscing returned with a cold, deadening impact. It seemed that everything must be right, but he couldn't be sure. He strained to catch what they were saying but their tones were lower now.

Then Dick kissed her again. Quickly, the old man thought. He turned to go and paused when he reached the path which led around to the front of the house. He turned to go and paused when he reached the path which led around to the front of the house. He turned for an instant and for that brief moment the old man could see his face clearly in the moonlight. "Goodnight, sweetheart," he called softly. The moon made silvery ripples on the girl's hair.

Charley Ferris straightened up, a smile on his lips. The fear he had felt all along was gone and in its place an exultation he had felt only once before . . . the night he had proposed to his wife!

"Did you hear that, Nancy?" he demanded. "Everything's all right. The trouble is all patched up." He turned from the window, leaving Dot standing quietly in the moonlight and went to his narrow bed. He paused for an instant before he got in . . . long enough to switch on the light and look at the picture of a dark-haired laughing girl in a high-collared, long-sleeved dress which stood on his bureau.

"Goodnight, sweetheart," he whispered and then turned off the light and sank back against the pillow with a contented sigh.

"Goodnight, sweetheart," he murmured once again before his eyes fell shut.

## Warm weather speeds Alberta harvesting work

EDMONTON. — Warm, dry weather of the last couple of weeks has provided ideal threshing conditions and rapid harvesting progress is reported in almost all areas of Alberta. R. E. English, statistician for the provincial department of agriculture, reported recently.

At Olds, Stettler, Lacombe, Ponoka, Edmonton, Westlock, Smoky Lake and Bonnyville districts five to 20 percent of oats and wheat were reported threshed at the weekend. In the south operations are nearer completion. Moisture in the fields still is hampering some cutting.

In the north, progress varies from two-thirds completed north of the Peace river to about one-third south of the river.

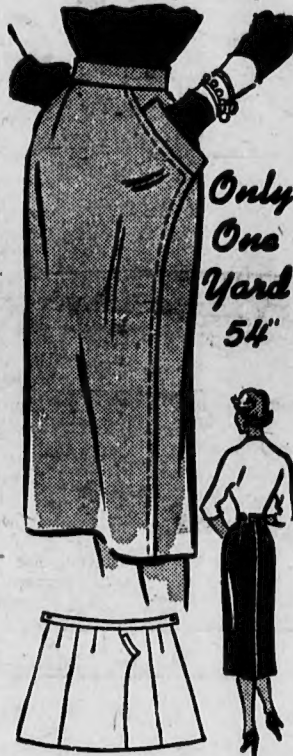

"Yields appear satisfactory in view of the condition of the crop at the time killing frosts occurred," Mr. English said. "Farmers are obtaining as much or more grain than expected at Sept. 20. But many fields of late oats and barley will not be threshed."

Quality is low with wheat grades in the south averaging No. 2 and 3 northern and in some districts east of Lethbridge oats and barley will grade above feed in northern parts of the Peace River district there is a little No. 2 northern and a great deal of oats and barley will rate C.W. grades.

In most other areas," he added, "most reporters suggest that wheat grades will average five or six and that oats and barley will fall almost equally into one and two feed with some three feed."

## Fashions

Very, very easy!

4514 WAIST 24"-32"

by Anne Adams

**ONE YARD WONDER!** Yes, you can make this new-fashion skirt in just one yard 54-inch fabric in ANY size given! Note the dramatic side slit and the jutting hip pocket. This is bound to become your favorite costume-maker. And it's SEW-EASY!

Pattern 4514: Misses' Waist Sizes 24, 25, 26, 28, 30, 32 inches. All given sizes: 1 yard 54-inch.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to:

Department P.P.L.,

Anne Adams Pattern Dept.,

60 Front Street W., Toronto.

**LOTS OF TURKEYS**

Canadian farmers had an estimated 3,500,000 turkeys in August, 1954, or 23 percent more in August, 1953.

Glass milk bottles first were used in Brooklyn in 1878.

## Pet baby moose is big eater, likes all comforts of home.

CLINTON, B.C.—Young Barney is getting downright pampered—and, brother, does he love it. And the Marvin Mayfields probably have the fastest growing family, pound for pound, in North America.

The family consists of Marv, his wife, three little girls, one little boy and one not-so-little moose, Barney.

Needless to say, the 300-pound Barney accounts for the fast-rising poundage.

Although Barney is only a youngster of six weeks, he's already established a solid beach-head in the Mayfield home.

Marv found Barney when Barney had been in this world about one week.

The little bull moose was lying alongside a road near this interior British Columbia community 200 miles north of Vancouver, too weak to stand. The mother was nowhere in sight.

Mayfield had to make a choice. Should he take the baby moose or should he leave it there to die?

Mayfield decided to take the little guy and he loaded it into his truck. At home, Mayfield and his wife first fed Barney with a bottle and then from a bucket.

Now Barney is just like one of the family and like the Mayfield

children he is right positive he has full access to the Mayfield home.

**Sofa-loving moose**

He's a kitchen-raider from the word go. And he's the dog-gone . . . moosiest hog of the frontroom davenport.

He eats anything he can lay a tooth to in the kitchen. The davenport is the next stop, sort of an after-breakfast nap you might say.

Barney, despite a penchant for pancakes and pancake batter, is rather particular about his eating habits. No hay for Barney, like any old ordinary woods moose.

He really goes for milk. He guzzles six gallons a day.

Mayfield has a fenced-in pasture near the house and that's where Mayfield will try to keep Barney when he grows horns.

## 4 Danish Bun Treats from One Basic Dough!

1. Apricot Turnovers

3. Jam Strips

2. Raisin Rounds

## For Luscious Variety use New Active Dry Yeast

This rich Danish Bun Dough rewards you with 4 gorgeous treats out of the same oven! Successful risings with Fleischmann's Active Dry Yeast are the secret! So whenever you bake at home, be sure you have Fleischmann's on hand.

## BASIC DANISH BUN DOUGH

Measure into a small bowl  
1 cup lukewarm water  
3 teaspoons granulated sugar  
and stir until sugar is dissolved.

Sprinkle with contents of  
3 envelopes Fleischmann's Active Dry Yeast

Let stand 10 minutes, THEN stir well. Sift together twice, then sift into mixing bowl  
6 cups once-sifted bread flour  
1/2 cup fine granulated sugar  
1 teaspoon salt

Cut in finely  
1 pound chilled butter or margarine

Beat together until light and thick  
2 eggs  
1 egg yolk  
and stir into yeast mixture.

Make a well in the flour mixture and pour in yeast mixture; combine thoroughly. Knead dough in the bowl until smooth. Cover dough closely with waxed paper and chill.

Beat together slightly with a fork and hold to finish fancy doughs,  
1 egg white  
1 tablespoon cold water

Turn out dough on lightly-floured board. Divide into 4 equal portions and finish as follows:

1. **Apricot Turnovers.** Roll out dough to 9 x 12 inches. Cut into 12 squares; moisten edges. Put spoonful of apricot jam on each square; fold into turnovers; seal; snip tops. Place on greased cookie sheet. Cover. Let rise in warm place 15 mins. Brush with egg-white mixture; sprinkle with chopped almonds and sugar. Bake in moderately hot oven, 375°, 20 mins.

2. **Raisin Rounds.** Cream 3 tbsps. butter; mix in 1/4 cup brown sugar, 1 tsp. flour, 1 tsp. grated lemon rind and 1/2 cup raisins. Roll out dough to 1/4-inch thickness; cut into 24 1/2-inch rounds. Moisten edges of half the rounds with water; place spoonful of raisin mixture on each one; cover with remaining rounds; seal; cut an X in top of each round. Place on greased cookie sheet. Cover. Let rise in warm place 15 minutes. Brush with egg-white mixture; sprinkle with sugar. Bake in moderately hot oven, 375°, 18 to 20 mins. Frost while hot, if desired.

3. **Jam Strips.** Roll out dough to 5 x 15 inches. Run strip of 2 tbsps. thick jam down each side, 1 inch in from edge. Moisten edges and fold over jam to meet in center; seal. Place on greased cookie sheet. Cover. Let rise in warm place 15 mins. Brush with egg-white mixture; sprinkle with sliced nuts and sugar. Bake in moderately hot oven, 375°, 25 to 30 mins. While hot, spoon thick lemon filling down centre. Drizzle with frosting.

4. **Cinnamon Braid.** Combine 1/4 cup sugar and 1/2 tsp. cinnamon; sprinkle all but 2 teaspoonsful on baking board; place dough on board; roll out to 9 x 14 inches; fold dough over twice. Repeat rolling and folding twice. Roll out dough to 4 x 18 inches; cut into 3 long strips, joined at one end; braid. Place on greased cookie sheet. Cover. Let rise in warm place 15 mins. Brush with egg-white mixture; sprinkle with 2 tbsps. chopped almonds and 2 tbsps. sugar mixture. Bake in moderately hot oven, 375°, 30 mins. Spread hot braid with frosting.

**CONFECTIONER'S FROSTING:** Combine 1 1/2 cups sifted icing sugar, 2 1/2 tbsps. milk and 1/2 tsp. vanilla.

## PROPANE GAS USERS!

## WINNIPEG &amp; CENTRAL GAS COMPANY

announce the purchase of

HOME GAS (Man.) LTD.  
HOME GAS (Sask.) LTD.  
SASKATOON PROPANE LTD.  
ATLAS PROPANE LTD.

In the very near future Winnipeg and Central Gas Company will expand the distribution of propane gas throughout the prairies and north-western Ontario. By this means the high standards of utility service, as enjoyed by city dwellers, will be made available to every rural consumer, who will thus be able individually to operate his own utility.

Natural Gas for areas contiguous to pipeline—  
Propane Gas everywhere else.

## WINNIPEG &amp; CENTRAL GAS CO.

### NOTICE TO CREDITORS AND CLAIMANTS

In the Estate of CHARLES EDOUARD GRENIER, late of Cluny, Alberta, Farmer, Deceased. NOTICE is hereby given that all persons having claims upon the estate of the above named CHARLES EDOUARD GRENIER who died on 16th September, 1946 are required to file with the undersigned by 11th December, 1954 a full statement duly verified of their claims and of any security held by them, and that after that date the Administrator will distribute the assets of the Deceased among the parties entitled thereto having regard only to the claims so filed or which have been brought to his knowledge.  
Dated at Land Titles Bldg., Calgary, Alberta, 28th October, 1954.  
D. L. SLOAN,  
Deputy Public Trustee.

Canada is the best customer the United States has; traditionally buys more from the United States than the United States buys from Canada.

It costs four times as much to build a house in Canada as it does in Germany.

## Important Meeting Meadowbrook Hall Monday

Marketing legislation and Producer Marketing Boards will be the subject for discussion at a public meeting to be held at the Meadowbrook Hall, three miles north of Gleichen on November 8th at 8 p.m.

The Federation of Agriculture in holding this series of meetings throughout Alberta and seeks a full and frank discussion of the subject and the opinions of as many farmers as possible. With this purpose in mind, the Federation urges all interested farmers and others to attend.

Mr. Roy C. Marler, president of the Alberta Federation of Agriculture; K. V. Kapler, vice-president, and Mr. G. E. Bell, local M.L.A., will be in attendance.

In Alberta there is a higher percentage of farm dressed poultry, turkeys particularly, marketed through wholesale channels than in any other province of Western Canada. The condition of this poultry arriving on our markets has been declining in recent years and has now become a major industry problem. Improper dressing is the major problem and necessitates rehandling of a large percentage of farm dressed poultry to complete processing of birds before they are eligible for Canadian Standard grades. This represents a very considerable expense in addition to the outright loss in grades and no doubt is reflected in poultry prices. With continued expansion and improvement, poultry processing plants are in a position to offer rail-grading service for a large part of our poultry crop. Dressing of poultry, particularly turkeys, should not be undertaken on the farm unless adequate equipment and help are available, and only with a complete knowledge of requirements and know-how. Turkey growers are urged to give serious

consideration to the rail-grading system of marketing and suggest that you contact the poultry processing plant of your choice for details regarding killing charges and delivery schedule.

One woman to another: "Why don't you go to him in a perfectly straight-forward way and lie about the whole affair."

The federal government had 181,129 people working for it in June, 3,120 more than in May and 11,335 more than in June of last year. Expanding at this rate, civil service should pass 200,000 mark about end of next year.

The average Canadian worker loses 10 days every year through sickness and accidents.

Canadians as a whole spend close to \$50,000,000 on dental bills in the course of a year.

Canadian universities graduate about 12,000 students annually.

The Call want ads do a good job for little pay.

## WHAT DOES PUBLIC WELFARE DO IN ALBERTA.

Public Welfare has become an important activity at all levels of government. In free societies such as Alberta the welfare for the unfortunate is the concern of every citizen and on this account there is need of a central organization to advise and assist all general community programs to ease the burden of the handicapped.

This is the reason why welfare as administered by the Department of Public Welfare has always been an integral part of the Alberta Government's welfare program which, with the exception of the Blind Persons' Allowances and the Old Age

Assistance, is financed entirely out of Provincial revenues. Ten years ago the total expenditures for this purpose amounted to \$5,216,887, while the amount provided for the present fiscal year has been set at \$10,902,945.

The responsibility for providing assistance in the form of food, fuel, clothing and shelter and when necessary, hospital and medical services to indigent persons rests with the municipality in which residence has been acquired. The Province provides grants to municipalities up to sixty percent of the cost of such assistance. The cost of providing the same form of assistance to persons who have no municipal residence is assumed by the province.

Single, homeless, unemployed men who have not acquired municipal residence are cared for in the Provincial hostels at Calgary and Edmonton. Those who are not in need of any special care are transferred to the healthy atmosphere at the Gunn Welfare Depot.

The training and rehabilitation of Alberta's Metis population is also provided by the Province. In colonies established in various parts of Alberta more than 2000 persons of mixed blood are living a protected life which offers them a future of independence and material success. Agriculture, lumbering and fishing are engaged in, providing revenue and a sense of self-sufficiency to the colonists.

Provision is made for the education of children and their spiritual welfare is

provided for by representatives of various religious denominations. General stores operate in two of the larger colonies supplying food and clothing at reasonable prices.

To enable municipalities to meet the housing requirements of their elderly or infirm citizens the province has made provision for the payment of construction grants to any municipality which builds homes for its aged and infirm. If the municipality is required to pay for any of their residents who have been transferred to larger centres, which situation seldom exists, a grant up to 50 percent of the cost thereof is available from the province.

Under an agreement with the Government of Canada the Alberta Government has set up a committee to deal with the rehabilitation of disabled persons by arranging medical treatment where necessary and for vocational training with a view of enabling such persons to become self-supporting.

Children who have become permanent wards of the government are placed in foster homes and as a rule are available for adoption.

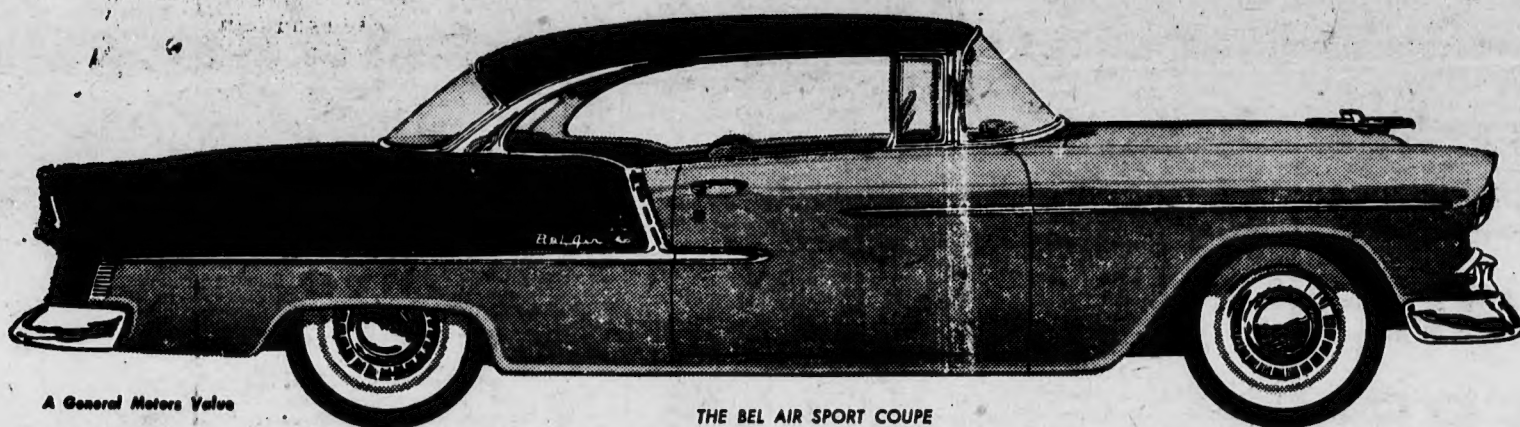

The entire cost of administration of these services and of Old Age Assistance, Blind Persons' Allowances, Widows' Pensions, Disabled Persons' Pensions, Supplementary Allowances and Mothers' Allowances is assumed by the Province. Of the payments made to recipients of Old Age Assistance and Blind Persons' Allowances a portion is recoverable from the Government of Canada, while in the case of Child Welfare and Mothers' Allowances the municipalities in which the beneficiaries resided or have acquired residence are liable for a portion of the amount expended.

Low...and behold!

# The motoramic Chevrolets for '55

A General Motors Value

THE BEL AIR SPORT COUPE

Chevrolet and General Motors took a whole new look at the low-cost car — and just look what happened!

NOW BEING SHOWN!

The valve-in-head V8  
as only the valve-in-head  
leader can build it!

8

Now Chevrolet, the leading builder of valve-in-head engines, introduces the "Turbo-Fire V8." It carries the V8 design to a new high in efficiency with its high horsepower (162!), high-compression (8 to 1!), high performance and surprisingly high gas mileage. Available with standard transmission, or with the extra-cost options of Overdrive or Powerglide.

You can choose from  
two new sixes, too

6

Chevrolet also offers the last word in six-cylinder performance and economy! There's a new "Blue-Flame 136" teamed with Powerglide and a new "Blue-Flame 123" with either standard transmission or Overdrive.

Can't you tell just by looking that Chevrolet and General Motors have come up with a completely new idea about the low-priced car? The idea is this: to build a car that offers the very newest thing in styling, the most modern features, the finest kind of performance and the highest quality of manufacture — all at a modest price. It's something that took a lot of doing and that only the world's largest car builders could do. Everything's new in this Motoramic Chevrolet from its lower top right down to its tubeless tires. Come in for the most fascinating visit you ever made to an automobile showroom!

More than a new car — a new **concept** of low-cost motoring
